I'm a student learning the Python programming language. I would like to get some programming exercises.
Please create 5 programming tasks without providing the solution. The difficulty level for the tasks should be easy

Vorschläge anzeigen ▾

5 Easy Python Programming Exercises

Exercise 1: Hello, World!

- **Task:** Create a Python program that prints the phrase "Hello, World!" to the console.

Exercise 2: Basic Calculations

- **Task:** Write a Python program that takes two numbers as input from the user, performs addition, subtraction, multiplication, and division, and prints the results.

Exercise 3: List Manipulation

- **Task:** Create a Python list containing a mix of numbers and strings. Then, write a program that:
 - Finds the length of the list.
 - Adds a new element to the end of the list.
 - Removes the first element from the list.
 - Sorts the list in ascending order.

Exercise 4: Conditional Statements

- **Task:** Write a Python program that takes a number as input from the user. If the number is positive, print "Positive"; if it's negative, print "Negative"; otherwise, print "Zero".

Exercise 5: Loops

- **Task:** Create a Python program that prints the numbers from 1 to 10 using a `for` loop.
