

I'm a student learning the Python programming language. I would like to get some programming exercises.  
Please create 5 programming tasks without providing the solution. The difficulty level for the tasks should be easy

Vorschläge anzeigen ▾

### 5 Easy Python Programming Exercises

#### 1. Hello, World!

- Create a program that prints "Hello, World!" to the console.

#### 2. Basic Calculator

- Write a program that takes two numbers as input and performs basic arithmetic operations (addition, subtraction, multiplication, and division). ▾

#### 3. Even or Odd

- Given a number as input, determine whether it's even or odd.

#### 4. Factorial

- Calculate the factorial of a given non-negative integer.

#### 5. Reverse String

- Reverse the order of characters in a given string.
