Copilot

Sure, I'd be happy to help!

(1) Bug(s) and Required Fixes:

- **Bug**: The `findGCD` method does not return any value. **Fix**: Add a return statement to return the value of `A` after the loop ends.
- **Bug**: The `findGCD` method is missing the `self` parameter. **Fix**: Add `self` as the first parameter of the `findGCD` method.
- **Bug**: The `main` method is not using the `self` parameter. **Fix**: Use `self` to call the `findGCD` method within the `main` method.

(2) Hint:

Ensure the `findGCD` method returns a value.
