Copilot

Sure! Here are five easy Python programming exercises for you:

1. **Sum of Two Numbers**:

   - Write a program that takes two numbers as input from the user and prints their sum.

2. **Odd or Even**:

   - Write a program that takes a number as input from the user and checks whether it is odd or even.

3. **Simple Calculator**:

   - Create a simple calculator that can perform basic arithmetic operations (addition, subtraction, multiplication, and division) based on user input.

4. **List Average**:

   - Write a program that takes a list of numbers as input and calculates the average of those numbers.

5. **Palindrome Checker**:

   - Write a program that checks whether a given string is a palindrome (a word, phrase, or sequence that reads the same backward as forward).

Happy coding! If you have any questions or need further assistance, feel free to ask. 😊
